

Cambodia solar all-in-one home use

Is solar power transforming remote communities in Cambodia?

Solar power is transforming remote communities in Cambodia with affordable, renewable energy and the chance to live more productive lives. However, hundreds of other villages remain off the grid, and energy experts say Cambodia should be doing more to harness the country's immense amount of untapped sunlight.

Is solar a good option in Cambodia?

In the middle of Cambodia, including the load center of Phnom Penh, which is responsible for approximately 70% of national electricity demand, the peak solar resource measures over 1,900 kWh per square meter per year. Solar is also a good option for remote rural households that do not currently have access to the grid.

Who is ecosun (Cambodia)?

Since 2008, EcoSun (Cambodia) Co., Ltd has been providing Cambodian households with a comprehensive range of solar-powered appliances and solar solutions. From energy-efficient appliances to sustainable solar and hybrid systems, we provide solar energy solutions tailored to meet any energy needs.

Do solar panels generate enough power for air-conditioning?

Yes, Solar Panels can generate enough power for your air-conditioning. However, most "normal" air-conditioning units take up a lot of electricity and you'd need many solar panels, an inverter and batteries to keep them running. Therefore, it's advisable to speak to our experts first to help you get the solar power system you need.
