

Moreover, green energy source awareness of the society increases exponentially and governments start to change their power policies to promote green energy sources. Therefore, ...

This paper aims to consolidate the work carried out in making base station (BS) green and energy efficient by integrating renewable energy sources (RES). Clean and green ...

General counsel face a looming ESG challenge: managing sustainability claims that could become potential litigation triggers. Proactive Risk Management is a Strategic ...

The impact of the Base Stations comes from the combination of the power consumption of the equipment itself (up to 1500 Watts for a nowadays macro base station) ...

Winning patent holder General Access Solutions proved infringement of 5G patents and its lawyer warns of massive implications for other wireless carriers and base station suppliers

The technology for a Green Base Station is already available, but costs and reliability are two of the most important challenges to solve before the Green Base Station can ...

A new power model structure is proposed in order to assess the power consumption of traditional base stations, their extensions, and alternative architectures such as large-scale antenna ...

Cellular Link filed the suit in the US District Court for the Eastern District of Texas on Wednesday, saying it owns wireless architecture technology that Verizon operates without ...

Goncalves et al. (2020) explored carbon neutrality evaluation of 5G base stations from the perspective of network structure and carbon sequestration. Despite the growing ...

In August 2021, it sued both AT& T and Verizon in the Eastern District of Texas. Nokia provides the base stations and related equipment for ...

In one of the most massive patent verdicts in legal history, a federal jury in East Texas has ordered cellular giant Verizon to pay patentholder ...

In one of the most massive patent verdicts in legal history, a federal jury in East Texas has ordered cellular giant Verizon to pay patentholder General Access Solutions \$847 ...

OPPO appears convinced that the patent is infringed when 5G is used for low-latency communication, and in this context pointed to a private 5G network that Nokia set up ...

Verizon Wireless convinced a federal judge in Texas to set aside a jury's \$847 million patent-infringement verdict and order a new trial.

Dallas-based GAS sued Verizon in 2022, arguing that the telecom company's 5G wireless base stations, mobile phones, hotspots and wireless routers violated its patent rights ...

Deep Green Wireless LLC, a subsidiary of General Patent Corporation (GPC), has added two defendants to the litigation campaign that it kicked off with a suit against NEC (2:15-cv-01186) ...

In times of steadily increasing energy costs and with the vanishing resources of the classic, non-regenerative energy sources, we see the challenge of finding new solutions ...

Dallas-based GAS sued Verizon in 2022, arguing that the telecom company's 5G wireless base stations, mobile phones, hotspots and wireless ...

A cellular communication system is provided comprising a terminal, a base station (for example UMTS) and a communication equipment designed to transmit data to a terminal and which is ...

Several techniques have been deployed to reduce the energy consumption of the base station in what is called a green base station. This paper presents an insight into these approaches and ...

Winning patent holder General Access Solutions proved infringement of 5G patents and its lawyer warns of massive implications for other wireless carriers and base ...

Based in Singapore, Procomm said it is the sole owner of the patents in question. Its lawsuit claims that Verizon and Ericsson infringed its patents in the planning, designing, ...

In August 2021, it sued both AT& T and Verizon in the Eastern District of Texas. Nokia provides the base stations and related equipment for use by AT& T while Ericsson does ...

The environmental consequences of base station installations, such as habitat disruption or excessive energy consumption, are growing concerns. Legal ...

The environmental consequences of base station installations, such as habitat disruption or excessive energy consumption, are growing concerns. Legal teams may need expert analysis ...

The standalone 4G LTE Manpack Base Station provides a quick and smart network for voice, data, video, and

Communications Green Base Station Litigation

Position Location for Information Services (PLI) for mounted and dismounted ...
