

Danish Communications installs 5G base stations

Will Denmark switch to 5G standalone?

Jakob Dirksen CTO of TDC NET, says: "We were the first to introduce 5G in Denmark and now we are taking the next big step by switching on 5G Standalone.

Does TDC net have a 5G network?

In September 2020, TDC NET went live with the first non-standalone (NSA) 5G network in Denmark, which worked alongside the existing 4G infrastructure provided by Ericsson.

What is a 5G SA network?

Danish digital infrastructure provider TDC NET, together with Ericsson, have launched the first 5G Standalone (5G SA) network in Denmark. The transition to high-performance 5G SA technology will enhance the regional 5G ecosystem, accelerate innovation across industries, and unlock exciting possibilities for consumers.

What does 5G Sa Mean for TDC net?

Also, the 5G SA network was said to signal major overall progress in TDC NET's technological transformation as it adopts cloud-native software architecture, leading to fast and reliable service innovation for subscribers with service providers using TDC NET's 5G network, while maintaining improved efficiency and network performance.

What is 5G standalone?

Niclas Backlund, Country Manager for Ericsson Denmark, says: "With the 5G Standalone network, we are now able to accelerate the Danish 5G ecosystem and provide a world-class mobile network with a range of new opportunities for consumers and businesses by enabling slicing, and thereby providing service differentiation.

Will TDC's 5G standalone deployment contribute to a net-zero emissions target?

The 5G standalone deployment in TDC's commercial network is expected to contribute to the service provider's roadmap towards a net-zero emissions target by 2030. [Click here to learn more about 5G standalone.](#)
