

Distribution box and mobile power supply

What is a temporary power distribution box?

Temporary power distribution boxes and carts serve as hubs for connecting electrical loads. Power centers and portable power stations act as a combination transformer and distribution panel to regulate and distribute power from a 480V AC power source.

How many amps does a power distribution box have?

Our power distribution boxes range from 20-800 Amps and are well known for being durable, long lasting and safe. Load Master (TM) Series portable power distribution boxes are the first in the industry to feature outputs with adjustable current ratings to match specific application loads.

What is a power distribution box (PDU)?

The PDU is sized to handle the load that the two generators can supply. Utility Distribution Boxes (UDBs) provide safe power distribution in applications requiring feed-thru to larger areas. Advanced Mobile Electric Power Distribution System (AMEPDIS) is a digitally controlled, highly ruggedized power distribution unit.
