

Georgia Solar Panel Assembly

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

Where is weSolar located in Georgia?

Also in Georgia, WeSolar CSP, a minority-owned renewable energy tech and design company headquartered in Princeton, New Jersey, will design a solar farm along with a microgrid that will supply the City of Washington, Georgia, that will replace natural gas use. Washington is 90 miles east of Atlanta and has a population of around 4,000.

What's going on with Georgia's solar industry?

Politics envelops the solar industry. Vice President Kamala Harris visited the plant earlier this year. At the state level, Republican Gov. Brian Kemp has wrestled with Democratic U.S. Sen. Jon Ossoff over political credit for electric vehicle and renewable energy investments flowing to Georgia.

Where are qcells solar panels made?

Seoul-headquartered PV solar-cell manufacturing giant Qcells today announced that it's opening a new solar panel manufacturing facility in Dalton, Georgia. It's a \$171 million expansion of Qcells' existing solar module manufacturing plant in Dalton, and that will create 470 additional jobs.
