

How to get EMS into your home using a Peruvian communication base station

How do you communicate during an emergency?

Whatever communication tools you use, be sure your emergency communications are clear, contain specific and adequate information, are in sync with other information being disseminated, and are accessible to the whole community. Indicate how day-to-day communication differs from communication during an incident.

Is ham radio only used for emergencies?

Ham radio is not only used for emergencies. It serves as an alternative means of communication that is independent and hard to censor, providing an option outside of government agencies and big media corporations that control much of our communication infrastructure.

How do I choose a commercial emergency radio?

Several commercial emergency radios include additional frequencies (e.g. weather channels), hand crank chargers, and flashlights. Make a list of the priority accessories and evaluate radios by their inclusion or exclusion. The basic radio choice is an AM/FM radio.

How do paramedics get into a locked house?

Paramedics have several options for getting into a locked house. They might use a lock box if there is one available or try to bump the lock. If the paramedics assume the person inside is in danger, they won't hesitate to break down the door to gain entry. It's a worst-case scenario come to life.

Which emergency radio should I choose?

If you are looking for a basic AM/FM Emergency Radio with backup solar power and a hand crank, the American Red Cross Emergency Radio is a great choice. A good VHF/UHF Radio should also pick up the FM Bands.

What power sources does the American Red Cross Emergency Radio have?

The American Red Cross Emergency Radio has backup solar power and a hand crank as power sources. If you are looking for a basic AM/FM Emergency Radio, this is a great little radio.
