

How to smash a base station power board with a hammer

And here I was, smashing my lifeblood with A FREAKING HAMMER. As I was reigning down blows upon it, it became very real to me how fragile and impermanent we are.

A Crucial Clarification: When using the hammer or drill method, it's essential to ensure the NAND flash memory chips are thoroughly destroyed. Simply smashing the casing ...

I've found disassembly, hacksaw or a hammer to be pretty effective on dead drives. All are cheap, disassembly allows you to use the head servo motor to mess with the ...

I've had it a couple of times and fixed the boards by carefully bending them back, but as pin density increases it's getting harder and harder. Beyond that you really don't need to worry.

Pretty much the title question, in theory, couldn't a burglar (if they knew the location of the base unit) just kick in a door and run to the base unit and smash it with a hammer or something ...

Hello all, I'm trying to figure out a place to put my base station. I've read about the "Smash and Crash" scenario where a burglar breaks into your home, tripping the SS alarm, but finds and ...

The estate of Mt. Holly in Blue Prince is full of puzzles and mysteries, with a new challenge hiding behind every corner (literally). If you've ...

The way you destroy the old computer will depend on your intentions for it down the road. Whether you want to recycle your computer, donate it, or smash it to bits, there is a ...

A power hammer's main job is to strike metal with controlled force and speed, making it much easier and faster to shape metal than using a hand hammer. Can I build a ...

Put the front side edge of your lineman's (while closed) on the nail. Hit the base of the metal part (right above the grip) of your lineman's with your hammer. Or if you think you have good aim, ...
