

What drives energy pricing in Indonesia?

Energy pricing is driven by evolving policy frameworks, subsidy structures, and ongoing infrastructure development. The Indonesia Energy Prices & Markets report provides comprehensive price and market data for key energy commodities in Indonesia. The report includes:

How is Indonesia's power market segmented?

Indonesia's power market is segmented by power generation source, power transmission and distribution. By power generation source, the market is segmented into oil and natural gas, coal, and renewables. For each segment, market sizing and forecasts have been done based on installed capacity in gigawatts (GW). Need A Different Region or Segment?

What percentage of Indonesian electricity is based on coal?

According to the Energy Institute Statistical Review of World Energy 2023, as of 2022, coal-based electricity generation had a share of close to 61.5% of the Indonesian electricity generation mix. This reliance on coal-based power plants comes from the coal mining industry in Indonesia.

How big is the Indonesia power market?

Image © Mordor Intelligence. Reuse requires attribution under CC BY 4.0. The Indonesia Power Market size in terms of installed base is expected to grow from 90.83 gigawatt in 2025 to 113.79 gigawatt by 2030, at a CAGR of 4.61% during the forecast period (2025-2030).

Why do Indonesians need energy storage?

Indonesia's focus on industrial growth creates a demand for reliable power. BESS can offer backup power, improve power quality, and enable cost savings through peak shaving. The Indonesian government recognizes the importance of energy storage.

Does Indonesia's power market operate under a single-buyer model?

The projections in our reports recognise the regulatory landscape in which the public and private sectors have to operate. Indonesia's power market operates under a single-buyer model.
