What is the electricity storage policy framework for Ireland?

The Electricity Storage Policy Framework for Ireland This is a strategic initiative aimed at transforming Ireland's energy infrastructure. As the use of renewable energy sources increases, so too does the challenge of managing the intermittent nature of these energy sources and ensuring that a stable energy infrastructure is in place.

Is Ireland a game changer for long duration energy storage?

Ireland - A Game Changer for Long Duration Energy Storage? This is the first electricity storage policy published in Ireland. The Irish Government's Climate Action Plan 2021 set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by 2030.

Does Ireland need an energy storage policy?

The Irish Government's Climate Action Plan 2021 set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by 2030. There are 10 key policy actions in the framework outlining the timings and key stakeholders involved in delivering them. Key points:

What is energy storage Ireland?

Energy Storage Ireland in 2019 recognised that solutions such as Pumped Storage Hydro (PSH), Liquid Air Energy Storage (LAES), Compressed Air Energy Storage (CAES) and others require locations with specific geographical characteristics which are not particularly common on in Ireland.

What storage technologies are needed in Ireland?

Currently the two key storage technologies in Ireland are short duration battery storage and pumped storage hydro. Both are established technologies and batteries especially are modular and have short build times. However, the future system may need additional storage technologies to encourage an optimal generation mix.

Will LDEs play a significant role in Ireland's energy system?

As quantified in the Call for Evidence, it is likely that LDES will play a significant role in Ireland's energy system by the end of the decade. This Call for Evidence offers stakeholders with interest in energy storage a unique opportunity to influence the framework that will influence Ireland's path for LDES in years to come.
