

Large-scale BESS project sales in the Baltic region, with Aura Power selling to Karjeru linija and Danish Sun Energy selling to Sunotec.

As of 2025, Latvia's energy storage capacity has grown 300% since 2020, with Riga leading this charge [8]. This isn't just about keeping smartphones charged; it's about rewriting Europe's ...

The largest energy storage battery system will provide energy storage to transfer the generated electricity to users when there is a shortage ...

According to the original plan, all infrastructure projects in Latvia will be completed by the end of 2025, with the bulk of the work completed by February 2025, ensuring technical readiness for ...

The two grid-scale battery energy storage systems will be connected in autumn 2025, aiding Latvia's synchronization with the continental European power grid.

Executive summary Latvia's energy transition is poised for renewed momentum. The IEA peer review of Latvia took place 18-25 September as part of Latvia's ...

The battery energy storage system (BESS) will be built at the Auvere industrial power plant complex in Ida-Viru county and will help balance the country's grid, state-owned ...

Market Forecast By Type (Storage Reservoir, Pumped Storage Plant, Hydro Pump), By Capacity (Large Scale Storage, Small Scale Storage, Underground Storage), By End Use (Grid ...

Battery storage. In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already ...

Understanding the electricity market in Latvia Primary energy sources in Latvia Latvia's energy sector primarily relies on a mix of resources. ...

The wind power unit of Estonian energy company Utilitas has added a 10 MW/20 MWh BESS to its 58.8 MW Targale Wind Park, which has been operating since 2022. Chinese company ...

As the Baltic states of Latvia, Lithuania, and Estonia prepare to decouple their combined electricity grid from Russia, in favor of Europe, in February 2025, Latvia has ...

Latvia's large underground Incukalna natural gas storage facility has proven instrumental in bolstering regional security of supply across the ...

Latvia 2024 This Energy Policy Review was prepared in partnership between the Government of Latvia and the IEA. It draws on the IEA's extensive knowledge and the inputs of expert peers ...

According to the original plan, all infrastructure projects in Latvia will be completed by the end of 2025, with the bulk of the work completed by ...

This tender is from the country of Latvia in Europe region. The tender was published by Joint-stock company "Latvenergo" on 13 Nov 2024 for Construction of battery energy storage ...

The most recent update regarding BESS installations is that in Tume and Rezekne, Latvia's transmission system operator "Augstsprieguma tīkli" (AST) in June 2025 installed ...

Large battery storage projects in Estonia and Latvia have moved forward as the Baltic energy system prepares to decouple from Russia in 2025.

Latvia's large underground Incukalna natural gas storage facility has proven instrumental in bolstering regional security of supply across the region following a ban on ...

The installed BESS will provide a capacity of 9 megawatts (MW) and an energy storage capacity of 18 megawatt-hours (MWh). The amount of electricity charged and ...

The largest energy storage battery system will provide energy storage to transfer the generated electricity to users when there is a shortage in the electricity system.

Latvia has decided that it will be able to independently build a nuclear power plant on its territory. There's nothing complicated about it. This is stated in the report of the Latvian ...

As the Baltic states of Latvia, Lithuania, and Estonia prepare to decouple their combined electricity grid from Russia, in favor of Europe, in ...
