

Mobile construction site power box

What is a construction box?

Also called construction boxes, they have: Single-phase or three-phase power sources: Phase refers to how power supplies distribute electricity. Single-phase 120/240V construction boxes can accommodate smaller power needs, while three-phase 208Y/120V and 480Y/277V boxes will handle larger loads. Need more power? For maximum output, try a 600V box.

Where can a power box be used?

In addition to being used on construction sites, the power box is also suitable for temporary power distribution at outdoor events, disaster recovery sites, industrial warehouses, and confined spaces where pre-existing power sources may not exist.

Can ETEC Powerbox be used on construction sites?

Optionally, the ETEC Powerbox can be equipped with an integrated DC fast charger with a charging capacity of up to 200 kW charging power allowing electric machines to be recharged at lightning speed. The ETEC Powerbox excels in versatility, reliability, and sustainability. It offers much more than just power on construction sites.

What are the best power boxes for a confined space?

If you are searching for an efficient power solution for a confined space, power distribution boxes and small spider boxes should be your top choice. These power boxes provide power where there is limited space and are a highly durable solution thanks to their robust construction for worry-free portability.

Why do you need a construction box?

Whether there's a large-scale power outage or a natural disaster, you can rely on construction boxes to power your relief efforts. Entertainment and events: If you're hosting a major event, you'll need electricity to support your equipment and a safe way to distribute it.
