

Are battery energy storage systems a key part of the Nordic energy transition?

Battery energy storage systems (BESS) continue to play a vital role in the Nordic energy transition. Based on Marsh's experience in advising BESS owners in the Nordics, cold climate challenges, ensuring safety, and optimizing spacing are key topics that are discussed for BESS development in the region.

When will a battery energy storage system be built in Sweden?

Construction has begun on Sweden's largest Battery Energy Storage System (BESS) undertaken by Neoen, an Independent Power Producer and Nidec, a system integrator. The project has been projected to come online in early 2025. Neoen is headquartered in Paris.

What is the largest energy storage investment in the Nordics?

"It is a great honor to inaugurate the largest energy storage investment in the Nordics, with 211 MW now connected to the power grid. "Thanks to the efforts of Ingrid Capacity and BW ESS, we are reducing grid congestion and enabling increased power production."

How will Bess impact the Nordics?

BESS will have a large impact on energy systems in the Nordics, helping the move toward carbon neutrality. However, ignoring the specific needs for BESS installations in the region could slow down progress. For more information on how these risks may affect your business, contact your Marsh advisers.

What is the largest energy capacity in the Nordics?

The largest by megawatt-hours energy capacity in the Nordics will be a 2-hour project in Finland that Neoen recently started building. It has a capacity of 112.9 MWh, and that is also set to come online at the start of 2025.

What are the risks associated with Bess projects in the Nordics?

However, several fundamental risk parameters specific to BESS projects in the Nordics need to be addressed by the project owners. These include natural catastrophe (NatCat) risks from extreme weather, such as heavy snowfall, storms, or flooding that can damage installations and allow water to reach batteries, which must remain dry.

The Yllikkälä Power Reserve 2 (YPR2) project in Finland This is a turnkey project for Neoen Finland, which benefits from a specific design, adapted for a solution with a longer ...

Increasing negative power prices on sunny days, rising solar curtailment rates, and the value of solar power dropping in pioneering Members States, is causing developers to begin to re ...

This thesis examines the integration of BESS into the Nordic energy system between 2023 and 2033, focusing

on their role in enhancing renewable energy adoption and ...

BOS Power and HiTHIUM sign a 3GWh battery energy storage agreement to support renewable projects across the Nordic region, marking a significant step in sustainable ...

Construction has begun on Sweden's largest Battery Energy Storage System (BESS) undertaken by Neoen, an Independent Power Producer and Nidec, a system ...

Madrid, Spain - September 5, 2025 -- HiTHIUM, a leading global company in long-duration energy storage technology, today announced it has signed a supply agreement (MSA) with ...

The Nordic region, with Sweden at the forefront, is entering an era of rapid BESS deployment. Historically, installations have focused on 1-2 hour systems, but the trend in ...

The adoption of BESS battery energy storage systems is pivotal in the global effort to reduce carbon emissions and achieve energy sustainability. ...

Nordic Batteries announces it is entering into a strategic partnership with Morrow Batteries and Eldrift to develop complete battery packs for mobile and ...

While Norway once aimed to be the "battery of Europe" it has since been overtaken other Nordic countries Sweden and Finland for BESS deployments. Research firm ...

Sweden's largest energy storage investment, totaling 211 MW, goes live, combining 14 sites. 14 large-scale battery storage systems (BESS) have come online in ...

Toshiba Group member Landis+Gyr has won a major order to supply a MegaWatt-class battery energy storage system (BESS) to Helen Ltd., a major energy utility operating in ...

Finland-headquartered clean energy solutions provider Fortum is to deploy the largest battery so far in the Nordic region, a 6.2MWh system at a ...

SEB Nordic Energy's portfolio company Locus Energy, in collaboration with Ingrid Capacity, proudly announces the groundbreaking of one of Finland's largest battery energy ...

In an era driven by an urgent need for sustainable energy solutions, battery energy storage systems (BESS) have become increasingly vital. According to data from Future Power ...

By enhancing the stability and efficiency of renewable energy, BESS is a vital component in the transition to sustainable energy systems. However, several fundamental risk ...

Nordic Energy Storage Power Station BESS

SEB Nordic Energy's portfolio company, Locus Energy collaborates with Ingrid Capacity to build the largest battery energy storage project in ...

Merus Power, together with Alpiq, has achieved a historic milestone for the Nordic energy market: the delivery of the region's first grid-forming battery energy storage system (BESS).

How many large-scale battery storage systems are there in Sweden? 14large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW /211 MWh into the ...

This transaction supports the company's ongoing ambition to accelerate the transition to renewable energy in the Nordic region. The 10MW BESS will be strategically ...
