

Portable power bank to protect against cold weather

Which power bank is suitable for outdoor use?

For outdoor use, cycling, camping, travel and active life, the waterproof Aqua Trek + is ideal. For a Tablet and phone, the essential 10Ah or 42Ah Super Power Bank has 4 times more capacity. For daily back up the Power Stick is ideal, fits in any pocket, holds a charge and auto starts.

Are Nitecore power banks durable?

There are few power banks that are as robust -- or, for that matter, as lightweight and durable -- as the Nitecore Summit line. These power banks have been designed to handle some of the harshest environments on the planet.

How much does a power bank cost?

No doubt they're pricey -- \$99 and \$149 respectively -- but you're getting a very solid, reliable power bank backed by an 18-month warranty. Not everyone needs this kind of power bank, but if you do, you do! Need power banks to handle the extreme cold? These carbon-fiber-encased units come with a built-in heater.

Does a power bank need a USB-A port?

Each power bank has a button, some LEDs to show power levels, and a USB-C port for input and output and USB-A for things that still require the old port (like my Suunto Wing bone conduction headset that ships with a proprietary charging cable and USB-A on the other end). Yes, it's 2024 and some things still need a USB-A port for charging!

Do power banks give up the ghost?

In my experience, the average power banks will give up the ghost well before this. These power banks have an extreme rating. Each power bank also comes with an insulated carry bag to protect it from the elements, along with a USB-C-to-USB-C cable. The Nitecore Summit power banks come with a USB-C-to-USB-C cable and an insulated bag.

What's the difference between a power bank and a lithium battery?

First, these are lightweight units -- essentially lithium batteries clad in carbon fiber. They're about as minimal as power banks get, but they're robust enough to withstand drops and falls up to 1.5 meters, and IPX5-rated for water and dust resistance. The 10,000 mAh unit weighs 6 ounces, while the 20,000 mAh power bank is 10.7 ounces.

For extra insulation I tend to use insulated gear that I don't use at the time e.g. mitts, down booties, parka, or sleeping bag. This combo did fine on Denali and other such ...
