

Romania's energy storage capacity by 2025

How much storage capacity will Romania have in 2025?

This single project will double Romania's current installed storage capacity of 398.8 MWh, a figure that comes from transmission system operator Transelectrica, and mentioned by Romania's energy minister Sebastian Burduja in April, 2025.

How much energy does Romania have in 2025?

At the beginning of 2025, Romania boasts approximately 3,000 MW in wind energy and 1,500 MW in solar energy. An additional 2,424 MW in wind and solar projects is expected to be operational in 2025, attracting over EUR2 billion in investments. Romania's Energy Goals for 2030: Achieve over 32,000 MW in total capacity by 2030.

How much money will be invested in Romania's energy sector?

Today, the Minister of Energy, Sebastian Burduja, announced on Facebook that an additional EUR150 million will be invested in Romania's energy sector. "I am pleased to announce that the Ministry of Energy is launching a new call for projects financed through the Modernization Fund, aimed at investments in energy storage capacities (batteries).

How much money is needed for energy storage projects in Romania?

The projects must focus on building new energy storage capacities in Romania," the minister stated. According to the minister, as quoted by ZF.ro, the total budget for this state aid scheme is EUR150 million in non-reimbursable funds sourced from the Modernization Fund.

Why is battery storage important in Romania?

In Romania's vision for the energy system by 2030 and after, energy storage in batteries plays a pivotal role in enhancing system flexibility. With the ability to offer primary, secondary, and tertiary regulation services, battery storage proves to be a reliable asset for system balance.

How much battery storage capacity will Romania have by 2035?

To achieve this enhanced flexibility, Romania's government has set a specific target of installing 1200 MW of battery storage capacity by 2030, with potential for storage of 2400 MWh and 2000 MW by 2035.

Storage solutions are indispensable for ensuring a stable and efficient grid. Investments in energy storage capacities are set to increase significantly in the coming years, ...

Romania is aiming to have at least 2.5 GW of battery energy storage systems (BESS) in operation by next year and to surpass 5 GW of capacity by 2026.

Romania's energy storage capacity by 2025

Bucharest, July 22, 2025 - Nova Power & Gas, a Romanian energy company and part of the E-INFRA Group, announces the launch of the largest battery energy storage project in Romania. ...

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via the National Recovery and Resilience Plan. A utility-scale solar ...

The data of the transmission and system operator show that, on January 1, 2025, 13 battery storage groups are operational in Romania, which have a total installed power of 137.2 ...

The CfD scheme is expected to play a vital role in Romania's energy transition by supporting the development of up to 5 GW of renewable energy capacity through competitive auctions held in ...

Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date. The company ...

Romania targets 2,500 new MW in the energy system in 2025, with investments such as Iernut, Mintia, Rastolita, Navodari and private projects co-financed through the PNRR, ...

Romania aims to add 2,500 MW of new capacity to its energy system by 2025, through investments in new energy-producing facilities and other projects co-financed with ...

The auction, funded by Romania's Modernization Fund, introduces a 15-year fixed-price mechanism, which will help mitigate financial risks for investors and offer predictable ...

Romania aims to have at least 2.5 GW of battery energy storage systems (BESS) in operation by next year and to surpass 5 GW of capacity by ...

“I am pleased to announce that the Ministry of Energy is launching a new call for projects financed through the Modernization Fund, aimed at investments in energy storage capacities (batteries).

Romania expects its overall energy storage to amount to at least 2.5 GW in operating power at the end of 2025, and to expand to as much as 5 GW a year later, local ...

Romania invests EUR150 million in battery storage systems, boosting renewable energy and aiming for 1 GW capacity by 2025. Join the green revolution today!

Stay updated on Legislative Changes in Romania's Energy Sector 2025 affecting utilities, renewable investments, and compliance requirements for your ...

Romania expects its overall energy storage to amount to at least 2.5 GW in operating power at the end of

Romania s energy storage capacity by 2025

2025, and to expand to as much as 5 ...

The new battery energy storage system (BESS) is expected to become operational by the end of 2025. According to the company, Nova is currently the national leader in energy ...

Romania's Ministry of Energy has announced a goal of adding 2,500 MW of new capacity to the country's energy system by 2025. This will be achieved through investments in ...

Romania's comprehensive approach to its internal energy market under the Energy Union Strategy includes a focus on electricity interconnectivity, aiming to achieve the 2030 target of ...

Romania prioritizes flexibility in its energy system, with a focus on energy storage, particularly batteries, and aims to enhance the competitiveness of the retail energy sector, protect energy ...

Romania s energy storage capacity by 2025
