

Russian energy storage system exports

How much natural gas does Russia export to OECD Europe?

Nearly three-quarters of Russia's natural gas exports flowed to OECD Europe last year, making up as much as 40% of the region's natural gas supplies. Europe's energy dependency on Russia has prompted much debate and soul-searching in the wake of Moscow's attack on Ukraine.

Does Russia export oil & natural gas?

Meanwhile, Russia has focused on exporting oil and natural gas to regions outside the EU to maintain its resource revenue. This paper analyzes the achievements and challenges facing this EU policy of 'de-Russification' and the trends among countries actively purchasing fossil fuels from Russia.

Does Russia still export gas to Europe?

Exports to Europe (including Turkey) still account for slightly under half of Russian gas exports. Following the start of the war in Ukraine and the cuts by Russia to EU countries, [iv] Russia's pipeline exports to the EU collapsed from 140 bcm in 2021 to 63 bcm in 2022 and around 27 bcm in 2023.

How much gas does Russia export in 2023?

In 2023, Russia exported an estimated 142 bcm of gas, down sharply from around 244 bcm in 2021. This included about 99 bcm of pipeline gas to Europe, FSU countries, and China, and around 44 bcm of LNG globally (see Figure 1). Exports to Europe (including Turkey) still account for slightly under half of Russian gas exports.

How has Russia's export strategy evolved over the past year?

In this commentary, the authors explore how Russia's export strategy has evolved over the past year in the face of mounting adversity and what it means for the world. In 2023, Russia exported an estimated 142 bcm of gas, down sharply from around 244 bcm in 2021.

How is Russia reshaping its gas strategy?

It is gradually (and quietly) reshaping its gas strategy based on two expansion pillars: liquefied natural gas (LNG) and pipeline gas exports to key non-EU consumers (Turkey, China, and former Soviet Union [FSU] countries).
