

Swaziland Solar Ecosystem

Is Eswatini a sustainable country?

A nation that has long relied on neighboring South Africa and Mozambique for unsustainable fossil fuel-based electricity imports, renewable energy in Eswatini is quickly diversifying. The transformative journey culminated at the COP26 conference, where Eswatini committed to an ambitious 50% surge in renewable energy production by 2030.

What is the main energy source in Eswatini?

Hydroelectric power currently stands as one of the most prominent energy sources in Eswatini. The EEC operates four hydropower plants, constituting 15% of the country's electricity production and plans to bolster the existing infrastructure.

How is the Swazi government advancing its energy infrastructure?

In collaboration with private entities and foreign aid programs, the Swazi government is taking crucial and necessary steps to advance its energy infrastructure and deliver power to the 17% of the population (more than 200,000 people) living without it.

What is Eswatini's energy revolution?

Eswatini's energy revolution is a testament to its dedication to sustainability and self-sufficiency. As Eswatini strides into the future with renewable energy, the convergence of local innovation, international collaboration and growth-oriented policies promises to illuminate every corner of the nation.

Can a wind turbine be installed in Eswatini?

While wind energy production in Eswatini is negligible, the country's mountainous regions hold immense potential for installing wind turbines. Government feasibility studies in the Lubombo Plateau, a largely uninhabited and undeveloped region near the border with Mozambique, are ongoing.

How can the Swazi government re-electrify emerging economies?

Through hands-on investment and partnerships with private corporations, the Swazi government exemplifies how emerging economies can electrify their populations with cutting-edge renewable energy technology. There is still much work and foreign investment can accelerate the process.

The overall electrification rate of Swaziland is just 27%; 40% of urban areas and 4% of rural regions. The country has significant solar resources to tap, with ...

It outlines a roadmap for a Just Energy Transition in the Kingdom. It aims to align growth and development with Eswatini's NDC commitment to generate 50% of energy from ...

1 day ago; If you're exploring solar power for your off-grid caravan or RV, you've probably come

Swaziland Solar Ecosystem

across Victron Energy. Known for their distinctive blue electronics, Victron is a major player in ...

In the heart of the Southern African plains lies Eswatini, a small landlocked country formerly known as Swaziland. A nation that has long relied on neighboring South Africa and ...
