

How will a large-scale storage system help the Swiss power grid?

In this way, the system will help to stabilise the Swiss power grid. With this large-scale storage system, we are making a decisive contribution to the implementation of Switzerland's Energy Strategy 2050, which aims to convert 100 per cent of its energy supply to renewable energies by 2050.

Where in Switzerland will Primeo energy install a battery storage system?

In Kappel, in the canton of Solothurn, we will install one of the largest battery storage systems in Switzerland with a total capacity of 65 megawatt hours. Primeo Energie will use the stand-alone storage system to make energy more flexible and store electricity temporarily and withdraw it again when it is needed.

How will Primeo energy contribute to the Swiss energy transition?

We are delighted to be taking a significant step in the Swiss energy transition together with Primeo Energie. In Kappel, in the canton of Solothurn, we will install one of the largest battery storage systems in Switzerland with a total capacity of 65 megawatt hours.

Does Switzerland's new large-scale battery support the Energy Strategy 2050?

The new large-scale battery for Switzerland in Kappel supports the Energy Strategy 2050 and supports renewable energies.

The energy storage industry has announced a historic commitment to invest \$100 billion in building and buying American-made grid batteries, including capital for new battery ...

The energy storage provider INTILION and Axpo, one of the largest producers of renewable energy in Switzerland, have successfully completed the first joint project.

Overview use of renewable energy sources (RES) and fostering energy efficient processes and technologies. The successful implementation of this plan, which is outlined in detail in the ...

10 hours ago; Over time, the storage projects will support NextEra Energy's zero-emissions mission while driving sustainable growth and long-term shareholder value.

Infrastructure investor Avadis Investment Foundation is buying a BESS project in Switzerland which could be the country's largest when it is scheduled to come online in 2027.

Projects across the country highlight the intrinsic ability of gravity to harness energy in an environmentally friendly manner, addressing the ...

As the Alpine glaciers slowly melt away, Switzerland will have the opportunity to build new dams and artificial lakes in the mountains. This will increase energy storage capacity ...

Infrastructure investor Avadis Investment Foundation is buying a BESS project in Switzerland which could be the country's largest when it is ...

Projects across the country highlight the intrinsic ability of gravity to harness energy in an environmentally friendly manner, addressing the challenges posed by variable ...

In a collaboration with Münchner Solarkraftwerke, Lion E-Mobility AG, the Swiss manufacturer of lithium-ion battery packs, aims to deliver more than 40 energy storage ...

Swiss Energy Research Energy storage infrastructure for 100% production from renewable energies and energy autonomy in Switzerland. SwissSTES Swiss Seasonal Thermal Energy ...

The Swiss investment group focuses on direct investments in energy transmission and energy generation assets, which can be complemented by investments in energy storage and energy ...

With its pilot and demonstration projects (P+D projects), the Swiss Federal Office of Energy (SFOE) promotes the development and testing of new technologies, solutions and approaches ...

WASHINGTON, D.C., April 29, 2025 - Today the American Clean Power Association (ACP), on behalf of the U.S. energy storage industry, announced ...

The Switzerland energy storage system market offers promising investment opportunities in various sectors such as lithium-ion batteries, pumped hydro storage, and flywheel energy ...

With this large-scale storage system, we are making an important contribution to implementing Switzerland's Energy Strategy 2050. The country is pursuing the goal of transitioning its ...

Current investment plans are focused on production facilities, and less on transmission, storage and distribution needed to transport hydrogen. More attention on risk factors that may hinder ...

A trio of European energy storage news stories, including battery storage projects in Germany and Switzerland from RWE and Hitachi Energy.

This funding will be used for project development costs, acquisitions, and equity investments to support the construction, commissioning, and operation of energy storage ...

Swiss investment fund and project development vehicle MW Storage has contracted Fluence to supply and

integrate a 20MW battery storage asset in Finland. The project will be a 1-hour ...

Battery storage: The Swiss Army knife of the energy transition Costs per unit for energy storage projects are falling again, price volatility is paving the way for increased returns, and political ...

Green Car Congress NOVEMBER 4, 2019 ABB officially opened a new plant for energy storage systems for mobility applications today in Baden, Switzerland. The energy ...

As we approach Q2 2025's bid deadline, one thing's clear: Switzerland isn't just buying storage systems--they're procuring grid resilience. The winners won't be those with the cheapest kWh ...

With this large-scale storage system, we are making an important contribution to implementing Switzerland's Energy Strategy 2050. The country is pursuing the ...
