

Swiss renewable energy producer Alpiq announced last week that a 900 MW pumped-hydro storage facility built in Finhaut, in the canton of Valais, ...

Its six turbines can generate up to 900 MW of power. This means that at its peak, the water battery can power up to 900,000 homes at once--all from 600 meters underground. The ...

The Fengning Pumped Storage Power Station, the world's largest facility of its kind, has commenced full operations with the commissioning of its ...

Located high in the Swiss Alps, Nant de Drance is a pumped storage hydropower plant that stores energy and generates electricity by moving water between higher and lower ...

A "water battery" hidden deep in the Swiss Alps is finally ready to begin storing 400,000 electric vehicles' worth of energy. The facility, also known as a pumped storage power ...

A giant "water battery" capable of storing as much energy as 400,000 electric car batteries has been switched on in Switzerland. The EUR2 billion project, located nearly 600 ...

Located in the Swiss Alps, in a subterranean cavern in the Canton of Valais, the pumped storage power plant can store as much electricity as ...

A new pumped-storage station in one of the highest and remotest parts of Switzerland will help cope with fluctuations in wind and solar-power supply. It can stabilize electricity output for the ...

The battery is located 600 metres underground between the reservoirs of Emosson and Vieux Emosson in Valais. It took 14 years to complete because of considerable logistical ...

A giant "water battery" capable of storing as much energy as 400,000 electric car batteries has been switched on in Switzerland. The EUR2 ...

A Swiss pumped-storage power station, which can both produce electricity and store power from other sources, has been officially inaugurated. The Nant de Drance ...

Liquid Flow Energy Storage Power Station Cost: What You Need to Know If you're an energy enthusiast, project developer, or just someone curious about the future of renewable storage, ...

Kraftwerke Linth-Limmern AG, a major Swiss high pressure storage power plant, is expanding its existing facilities under the Linthal 2015 project to be able to ensure security of ...

A Swiss company has built what is being called a giant water battery deep under the Alps that provides an energy storage capacity equivalent to 400,000 electric car batteries.

A Swiss pumped-storage power station, which can both produce electricity and store power from other sources, has been officially inaugurated. ...

Why Pumped Storage Is the Swiss Army Knife of Renewable Energy Ever wondered how we can store solar energy captured at noon for your Netflix binge at midnight? ...

Cool Tech Alert: The Swiss Army Knives of Energy Storage ? Vanadium redox flow batteries (the new VIPs in chemical storage) ? Compressed air systems using underground ...

Swiss renewable energy producer Alpiq announced last week that a 900 MW pumped-hydro storage facility built in Finhaut, in the canton of Valais, Switzerland, has started ...

Located in the Swiss Alps, in a subterranean cavern in the Canton of Valais, the pumped storage power plant can store as much electricity as 400,000 electric car batteries.

Swiss underground energy storage power station
