

When will 5G be available in Turkey?

ISTANBUL, Aug 19 (Reuters) - Turkey plans to launch a long-awaited 5G frequency tender in October with initial service expected to be available in 2026, its transport and infrastructure minister said on Tuesday. Abdulkadir Uraloglu said Turkey had consulted with its three major telecom operators and studied global 5G models, particularly in Europe.

How much will Turkey pay for a GHz telecommunications tender?

Uraloglu had previously said he hoped to hold the tender in August. According to a presidential decree published on Turkey's official gazette on Saturday, the tender will include 11 frequency packages across the 700 MHz and 3.5 GHz bands, with individual package values ranging from \$50 million to \$425 million.

How much will Turkey pay for a new GHz antenna?

According to a presidential decree published on Turkey's official gazette on Saturday, the tender will include 11 frequency packages across the 700 MHz and 3.5 GHz bands, with individual package values ranging from \$50 million to \$425 million. The decree set the minimum price for the available frequency packages at \$2.13 billion.
