

Want to contract solar photovoltaic panel installation

What is a solar power contract?

A solar contract is a signed agreement between a person and a solar power installation company that clearly outlines every part of the solar panel installation process, including the steps before, during, and after the actual installation, and who is responsible for each.

How do I choose a solar panel installation contractor?

A solar panel installation contractor should have licensing and insurance to legally practice in most states. When you're hiring a pro, look for one with at least three years of experience in their field and get quotes from at least three different pros before making your decision.

Do you need a solar company to install your solar system?

In most cases, your solar company orders your panels and system parts for you, especially in the event of a lease or PPA. If you've skipped a few steps and already have your solar panels, some contractors may be willing to install your rooftop array and complete the system with any other components necessary for safe and efficient operation.

How do I understand my solar power contract?

To understand your solar power contract and make sure you get what you deserve, you can start by learning a few basic terms. Pay special attention to any language that connects you with the installation company, and outlines what you can expect the company to do for you.

What should a solar installation contract include?

Your solar installation contract should include crucial details about what happens and who is responsible for each, such as: Before your solar panel installation company can begin work on your roof, they have to get construction and/or electrical work permits from the city or county where you live.

Should you choose a small Solar Installer?

O'Meara notes that with many large installers, consumers have no say as to what type of panel is purchased or how the system is installed. If a homeowner envisions being part of the design, purchase, and installation of the solar system and its components, a smaller installer is ideal. Your solar set up doesn't need special configurations/panels.
